Company Profile

Cybernetic Global Intelligence is an IAF Accredited ISO 27001 Certified, PCI DSS QSA, Global Cyber Security firm. We help companies protect their data and minimize their vulnerability to cyber threats through a range of services such as Cyber Security Audits, Statement on Standards for Attestation Engagement (SSAE 18), Penetration Testing, Managed Security Services, Web Application Security, PCI DSS QSA, ISO 27001, APRA's New Cyber Security Standards CPS 234, Essential Eight, Privacy Act 1988, NIST CSF and many more. Our services are carried out by certified cyber security specialists who have made protecting companies from cybercrime their key mission.
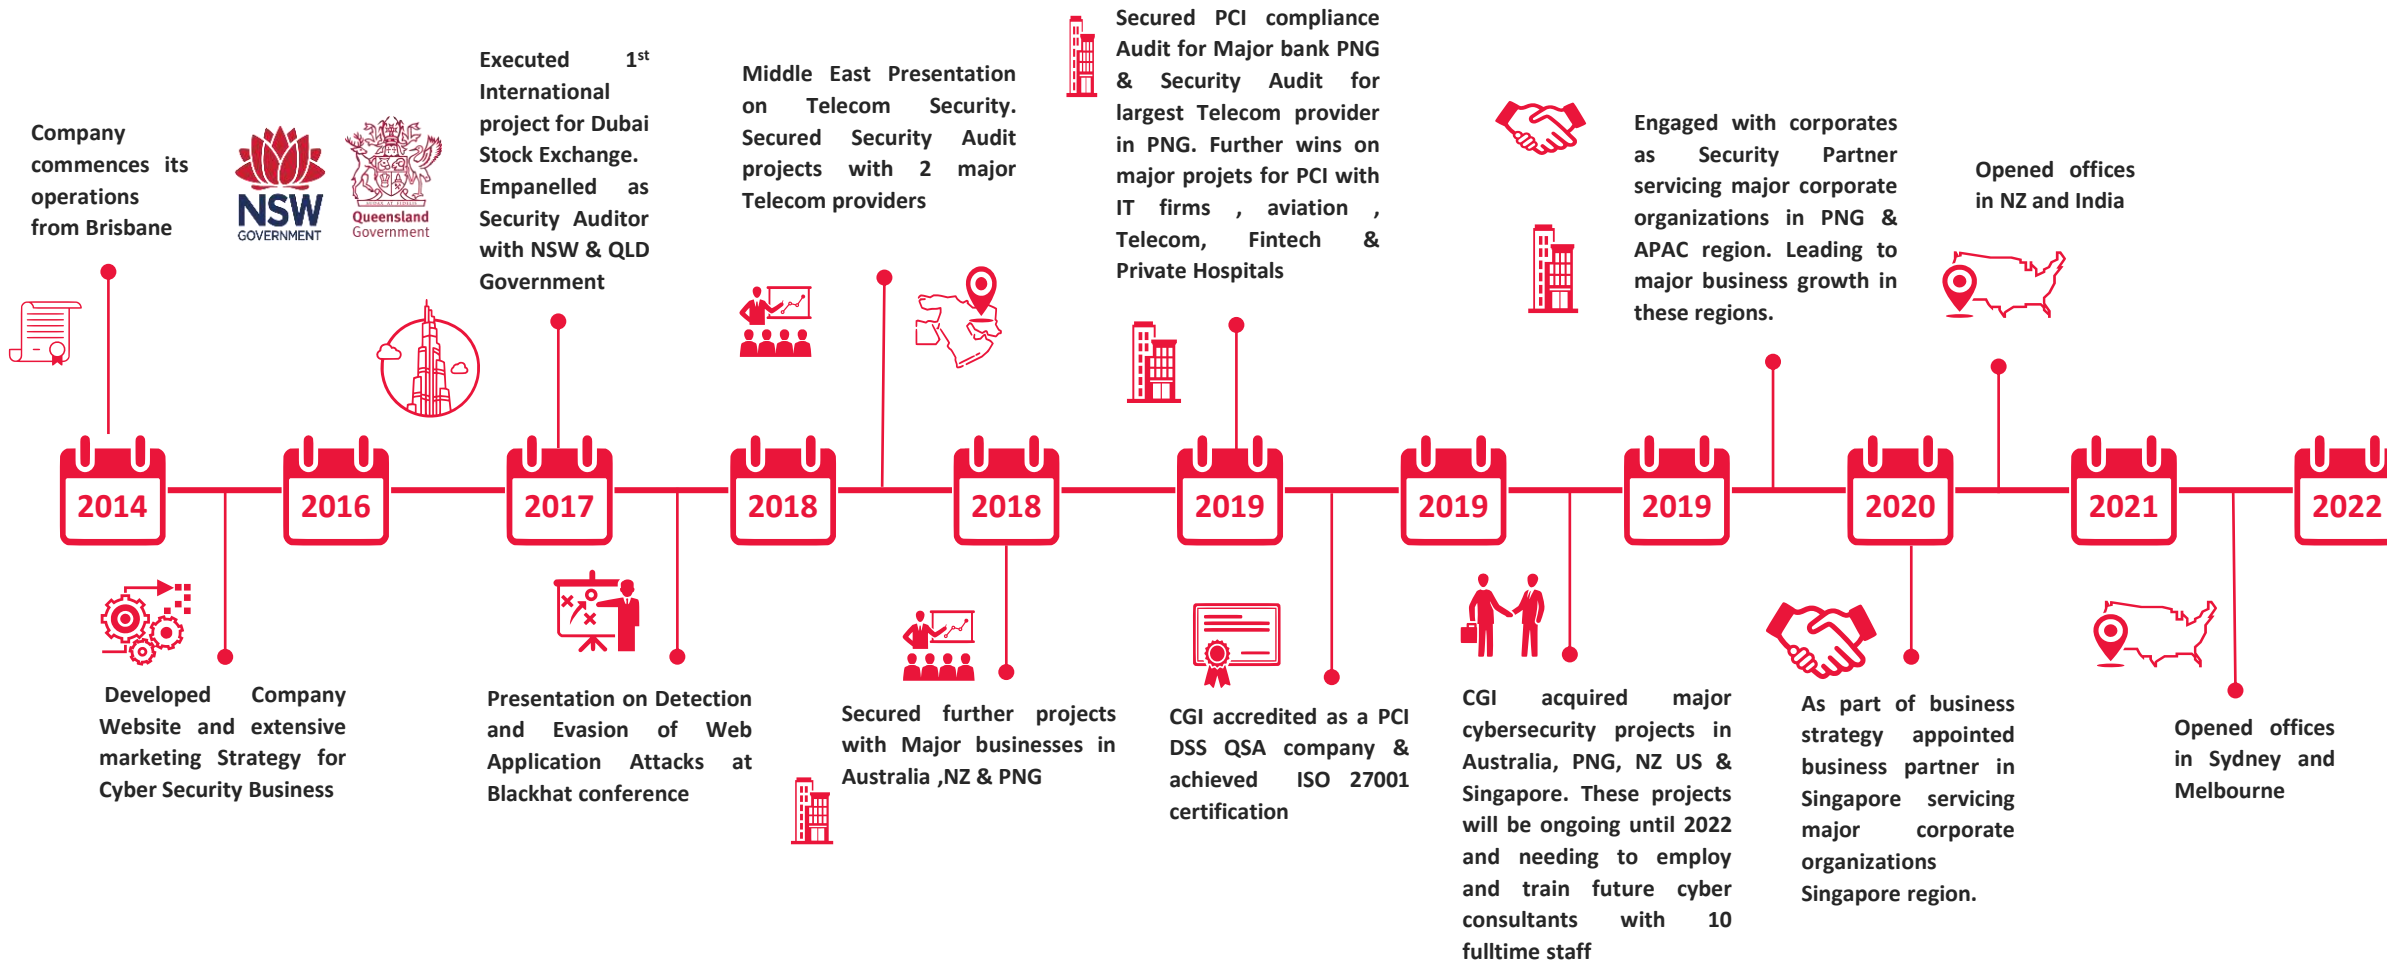

Our head office is located in the heart of Brisbane's CBD, with offices in Sydney, Melbourne and Wellington New Zealand, yet also having a global presence with clients spanning the Asian-Pacific region, Europe, USA, Middle East, PNG and of course Australia and New Zealand. Our services are carried out by certified cyber security specialists who have made protecting companies from cybercrime their key mission.

We are an emerging and quickly growing company with an exceptional advantage: our security experts are not only employees; they hold a stake in the business. This provides us with committed and empowered employees who are constantly acquiring new qualifications and striving to stay at the forefront of cyber security. Furthermore, we follow industry standards such as the ISO 27001, ISO 22301, OWASP, OSSTMM and ITIL to create a process-based approach when delivering our expert services to ensure every service we provide is of the highest quality.
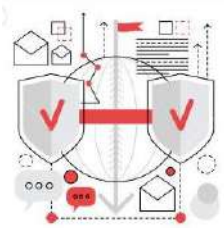

Our Mission

- Educate our customers and the global community on safety in the digital space and promote actions leading to public awareness.

- Protect our customers' networks and systems with meticulous diligence, utilizing state of the art practices and technologies.

- Promote innovation and enable our customers to function in a safe and secure environment.

- Provide all organizations with tailored and cost effective protection, regardless of their industry or size. Because everyone deserves to work in a safe digital environment, unhindered by cyber threats.
